

# AT&T California

## WHO WE ARE

**AT&T is committed to investing in California** to expand coverage and improve connectivity in more communities. AT&T is committed to keeping our customers and communities connected—both through investing in our networks and in working with state and local governments to efficiently build out broadband networks to help close the digital divide. Across the State, AT&T California's External and Legislative Affairs team is working with state and local leaders, like yourself, to not only bring Californians the best possible network, but to support and sustain healthy, thriving communities.

As technology evolves, we're continuing to make substantial investments in wireless capabilities and fiber to reach more customers with faster speed technologies. In California, we're focused on enhancing our network with more advanced fiber and wireless services, which Californians need for work, school and entertainment.

We are sharing information with you about AT&T's networks in California—as well as examples of AT&T California's support for our communities. Whether it is for public safety, education, or support for vulnerable communities, all of our work involves strong collaborations with local officials and organizations.

We look forward to answering any questions you may have regarding communications policy, network enhancements, our community outreach efforts and more. Thank you for your shared dedication to the people of California.

## Committed to a Better Tomorrow

AT&T is proud of our commitment to California's communities. Below are a few examples of our investment in the communities where our employees live and work.

### Advancing Digital Equity in California

- In 2023, AT&T and the AT&T Foundation amplified their commitment to California's communities with a significant investment, focusing on a \$2 billion initiative to expand digital inclusion and bridge the connectivity gap across underserved areas.
- AT&T is investing in our fiber network to meet the demands for reliable, high-speed connections today—and in the future. In 2022 and 2023, the Rincon Band of Luiseño Indians and the San Pasqual Band of Mission Indians both announced new projects with AT&T that will bring AT&T Fiber to more than 400 homes and 500 residential and small business locations, respectively.
- We've opened seven AT&T Connected Learning Centers in California, including two on Tribal land—at the Rincon Reservation in San Diego County and the Boys & Girls Club of Pinoleville Pomo Nation in Ukiah—that are providing highspeed AT&T Fiber internet, Wi-Fi and technology resources in under-served communities.
- In 2023, AT&T donated more than 4,000 free devices to students and families to help bridge the digital divide through our collaboration with community-based organizations across the state, including Dev Mission, BAYCAT, 826 Valencia, Mission Bit, Paradise Teen Center, The Village Project, The Fresno Center, Community Coalition of South Los Angeles, Concerned Black Men of Los Angeles and The RightWay Foundation.
  - AT&T partnered with Human-I-T to provide more than 500 laptops to five California Tribal communities to help students and families fully participate in our digital world.
- AT&T donated \$50,000 to the California Emerging Technology Fund (CETF) to help low-income households across the state get connected to the Internet and become digitally skilled. The program's Digital Navigators will connect individuals and families to computing devices, Internet access, and digital literacy training, all in an effort to help close the digital divide.

### Supporting Our Communities

- In Los Angeles, we support organizations like Brotherhood Crusade, Proyecto Pastoral and Homeboy Industries to help support efforts to serve at-risk and underserved communities.
- We made a significant financial donation to the Panetta Institute for Public Policy's Congressional Internship program to empower students from underserved communities.
- Through Believe Bay Area<sup>SM</sup>, we expanded economic empowerment in black and underserved communities in the Bay Area with 80 scholarships to online academics through Dev/ Mission and VetsInTech.
- Since 2018, AT&T has supported Trevor Text and TrevorChat, The Trevor Project's digital crisis intervention and suicide prevention services for LGBTQ+ youth available 24/7. We have contributed \$1.7 million over the past three years, which has helped the organization modernize and transform their suicide prevention capabilities.

### Providing Aid to Communities Impacted by California Natural Disasters

- Following severe storms and flooding that impacted California in 2023, AT&T provided \$20,000 to Ventures to support those affected and meet the ongoing critical needs of the Spanish speaking residents of the Pajaro community.
- AT&T donated \$200,000 to the California Fire Foundation to support immediate, short-term relief to survivors of disasters to meet their basic needs such as food and clothing.
- During the Dixie Fire, AT&T provided \$30,000 in relief to the Almanor Foundation Wildfire Relief Fund, the American Red Cross Gold Country Region and the Plumas Crisis Intervention and Resource Center.
